

Roles and scopes

Canonical reference for World Class Scholars governance RBAC. Enforced in Postgres (RLS) and mirrored in `requirePermission()` server guards.

Roles

Key	Name	Primary responsibility
founder_admin	Founder Admin	Ultimate owner and override authority
platform_admin	Platform Admin	Infrastructure, deployment, security
product_manager	Product Manager	Roadmap and release coordination
content_manager	Content Manager	Website announcements and content
ios_release_manager	iOS Release Manager	App release operations
rd_coordinator	R&D Coordinator	R&D evidence oversight
finance_grants_manager	Finance & Grants Manager	Grant reporting and expenditure mapping
support_lead	Support Lead	Support and incident workflows
engineer	Engineer	Product and system development
contractor	Contractor	Scoped external contributor

Permissions

Key	Description
manage_access	Assign and revoke roles and scopes
manage_domains	Manage domain/DNS
manage_billing	Manage billing and owner-level commercial settings
publish_content	Create and publish website content
edit_ui_copy	Edit user-facing product and website copy
manage_media	Upload and organize media assets
manage_release	Prepare release operations and metadata
approve_release	Approve release to production or App Store

view_finance	View finance and grant records
approve_grant_report	Approve milestone and acquittal reporting
create_rd_record	Create experimental evidence entries
approve_rd_record	Approve curated R&D evidence records
export_evidence_pack	Export structured evidence packages
view_audit_logs	View audit and governance logs
manage_support_cases	Manage support and issue workflows

Resource scopes

Key	Kind	Label
org-global	org	World Class Scholars Global
website-main	website	Main Website
etherealveil-ios	ios_app	EtherealVeil iOS
wcslib-ios	ios_app	WCSLiB iOS
wcs-platform-rd-2026	rd_project	WCS Platform R&D 2026
etherealveil-rd-2026	rd_project	EtherealVeil R&D 2026
grant-rd-funding-2026	grant	R&D Funding 2026
production	environment	Production Environment
staging	environment	Staging Environment

Role → permission mapping (summary)

Role	Permissions
founder_admin	All permissions (all scopes via assignment)
platform_admin	manage_release, approve_release, view_audit_logs
content_manager	publish_content, edit_ui_copy, manage_media
ios_release_manager	manage_release
rd_coordinator	create_rd_record, approve_rd_record, export_evidence_pack
finance_grants_manager	view_finance, approve_grant_report, export_evidence_pack

support_lead	manage_support_cases
engineer	create_rd_record, manage_release
product_manager	manage_release, publish_content

Permissions are checked **per scope** via `user_has_permission_for_scope(user_id, permission_key, scope_key)`.

Example assignments

User	Role	Scope	Can do	Cannot do
Founder	founder_admin	org-global	Full override via <code>is_founder_admin()</code>	—
Content manager	content_manager	website-main	Publish website content	Access control, R&D approval
Engineer	engineer	etherealveil-rd-2026	Log R&D evidence, release prep	manage_access, grant sign-off
R&D coordinator	rd_coordinator	etherealveil-rd-2026	Create/approve/export R&D evidence	Unilateral spend approval

Assigning roles

Use SQL or the /access console (requires `manage_access` on `org-global`):

```
select public.assign_role_for_scope(
  '<user-uuid>',
  'content_manager',
  'website-main',
  '<founder-uuid>'
);
```

Verify:

```
select public.user_has_permission_for_scope('<user-uuid>', 'publish_content', 'website-
```

See also <docs/role-matrix.md> for the original engineering reference.
